

Land-to-Sea Shaking Studies Workshop

Unlocking the full potential of subaqueous
paleoseismology at active plate boundaries

Image: Paliwan Formation at Taiyuan Basin, E. Taiwan

2-day workshop, 1-day field excursion, 1-day proposal writing

WHAT?

[More details on the workshop website here](#)

WHEN?

21-24 October 2025

WHERE?

National Taiwan University, Taipei

WHO?

We aim to gather international experts ranging from marine seismologists to limnologists, and students to senior scientists, to discuss and develop future proposals aimed at tracking past earthquake-shaking across land-to-sea transects to enhance fundamental understanding of rupture processes, earthquake recurrence and associated hazards at active plate boundaries.

Keynotes from **Harold Tobin** (Univ. Washington), **Lydia Staisch** (USGS), **Jasper Moernaut** (UIBK), and **Hajime Naruse** (Kyoto Uni.)

International organization and steering committee:

Charlotte Pizer, UIBK, Innsbruck, Austria
Katleen Wils, Ghent University, Belgium
Ryo Nakanishi, Kyoto University, Japan
Chloe Seibert, University of Minnesota, US
Tzu-Ting Chen, NTU Taipei, Taiwan

Michael Strasser, UIBK, Innsbruck, Austria
Jyh-Jaan Steven Huang, NTU Taipei, Taiwan (local host)
Jamie Howarth, VUW, New Zealand
Ken Ikehara, AIST, Japan
Cecilia McHugh, Queens University of New York, US

HOW?

Limited spaces! Applications open now until 4th May
