FUTURE MEETINGS

=====

January 6-8, 1982

UNITED KINGDOM (Manchester)

WORKSHOP ON GEOLOGICAL APPLICATIONS OF CATHODOLUMINESCENCE

The workshop will be organized as follows :
there will be an introductory session on January 6th,
followed by a day and a half of talks and practical sessions. The aims of the workshop are :
a) to introduce cathodoluminescence of rocks and minerals to people new to the technique, and
b) to provide a forum for more experienced users to exchange notes on progress.

Costs : about £11.50 per night for bed, breakfast and evening meal plus a registration fee of £12.50 for professionals or £3.00 for graduate students.

For further information, please contact :

K. Schofield, A.E. Adams,
P. Gutteridge c/o

March 31-April 2, 1982

UNITED KINGDOM (Nottingham)

WORKSHOP ON THE ENGLISH ZECHSTEIN "EZ 82"

The workshop is designed for discussion of all aspects of current research on the Zechstein basin and it is hoped that participants will include workers on similar carbonate/evaporite basins. Sessions include sedimentology and diagenesis of carbonates and evaporites, palaeontology and economic aspects. A pre-workshop field excursion will be held from March 25 to March 30.

For further details, please contact :

April 5-7, 1982

DENMARK (Copenhagen)

THIRD I.A.S. EUROPEAN MEETING

The second circular has now been sent to those who responded to the first circular. Other I.A.S. Members who wish to receive the second circular should write immediately to :

Lars B. Clemmensen,
Institut for Almenegeologi
Oester Voldgade 10
DK-1350 Copenhagen K
DENMARK

July 19-24, 1982

NORWAY (Bergen)

THIRD INTERNATIONAL MEETING ON RADIOLARIAN

Les 19 - 24 juillet 1982 se tiendra à l'Institut de Biologie Marine Herdla, (Université de Bergen, Norvège) la troisième réunion bisannuelle de Eurorad. Cette réunion regroupe les chercheurs de différents pays travaillant sur les radiolaires actuels ou anciens. Elle est l'occasion de discussions entre spécialistes d'horizons divers regroupés sous le nom EURORAD. Ce groupe ainsi formé a été reconnu en 1981 en tant que International Research Group of I.P.A. (International Paleontological Association). Pour tous renseignements concernant la réunion Eurorad III, s'adresser à :

Dr. K. Bjørklund,
Universitetet i Bergen,
Geologisk Institutt Avd. B,
Alleg 41,
N 5014 Bergen
NORVEGE (NORWAY)

September 1982

SOUTH AFRICA (Johannesburg)

THIRD SYMPOSIUM OF THE SOUTH AFRICAN DIVISION
OF SEDIMENTOLOGISTS

The Third Symposium of the South African Division of Sedimentologists is to be held in September 1982 in Johannesburg. The symposium will have as its theme applied sedimentology, because of the overwhelming importance of the discipline in the exploration for and exploitation of ore deposits in Southern Africa.

The symposium is entitled "SEDIMENTOLOGY APPLIED TO EXPLORATION, MINING, ENGINEERING AND ENVIRONMENTAL STUDIES" and will include the sedimentological aspects of placer deposits, epigenetic uranium deposits, stratiform and stratabound sulphide and gold deposits, carbonates and lead-zinc mineralisation, coal, petroleum, iron, manganese, clay and bauxite deposits, engineering and environmental sedimentology.

PROGRAMME

The symposium will extend over three days and will be followed by an excursion lasting four days. The sedimentary rocks to be examined on the excursion will be the Proterozoic Transvaal Supergroup carbonates and iron formations exposed in the Griqualand West area of the Northern Cape.

VENUE : Rand Afrikaans University, Johannesburg

DATES : Symposium 13-15 September 1982
Excursion 16-19 September 1982

REGISTRATION : The registration fee will be nominal

ACCOMODATION : Persons wishing to attend the symposium should make their own arrangements for accomodation. Lunches and teas will be provided.

SUBMISSION OF PAPERS :

All persons working on economic, engineering or environmental sedimentology are invited to present papers at the symposium. The emphasis should preferably be on sedimentary modelling. Short abstracts of not more than one hundred words should reach the organizing committee by January 31st, 1982, extended abstracts by June 30th, 1982, and drafts for publication on the opening day of the symposium.

CORRESPONDENCE : All correspondence and enquiries should be addressed to :

April-May 1983

YUGOSLAVIA (Split)

FOURTH I.A.S. EUROPEAN MEETING

The Fourth I.A.S. European Meeting will take place in Yugoslavia/Split, Croatia, late in April or early in May, 1983.

The programme will be as follows :

- Three days of plenary sessions (contributions welcome);
- Panels will be available for displaying posters;

- Short field trips (two days) are planned before and after the main sessions. The subjects will include :

- 1) Tidal flat, lagoonal and shallow marine carbonate sediments (Upper Jurassic and Cretaceous, Istria);
- 2) Upper Cretaceous carbonate platform depositional environments, their relation with asphalt and bitumen occurrences (Dalmatian's islands);
- 3) Paleogene clastic facies in northern Dalmatia (Flysch and "Promina" beds) : channels, massive beds, large exotic blocks, carbonate turbidites, conglomerate horizons.

All correspondence regarding the Meeting and Field trips should be addressed to :

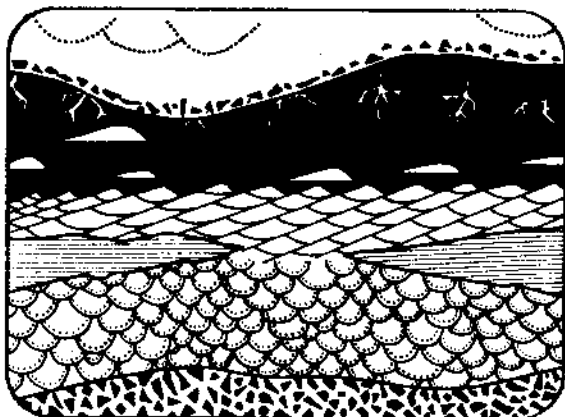

Dr. Vladimir Jelaska
Geoloski zavod
Sachsova 2
41000 Zagreb
YUGOSLAVIA

11TH INTERNATIONAL CONGRESS ON SEDIMENTOLOGY
HAMILTON, ONTARIO, CANADA 22-28 AUGUST 1982

New advanced registration fees (until May 1st, 1982) :

I.A.S. registrant	: \$ 95
Registrant not I.A.S. member	: \$ 120
Accompanying registrants	: \$ 30
Students	: \$ 40

I.A.S. members : please, assist the organizers by registering as soon as you can to help them with cash flow to the end of 1981.

Abstracts deadline is February 1st, 1982.

Second Circular is being sent to all who have responded to the First one; if you have not done so, contact :

the Chairman G. Middleton
